A Zuniel Prood.

Now that Tucson has organized a company of Territorial Guards, and Indians it would be well for Gen. Miles to double the guards round the reservations.

The Recent Battle.
The full particulars of the recent engagement by the Mexican forces with the hostiles are given in the following special dispatch to the San Francisco Alta:

An important fight took place today in the Teacupua pass, near the Legion or Potrero ranch, and close to town of San Carlos, directly west of Queroban station, on the Sonora Railway, and fifteen miles from Magdalena, the third city in Sonora. Patricio Valencia, with only ten Mexicans, from the village of Cucupura, attacked between fifty and sixty Apaches, and after a stubborn fight defeated them in a few days.

Notes of Travel.

The new bridge spanning the Colorado river is a most substantial structure, braced and counter-braced to such an extent as to appear built for every emergency and capable to withstand any amount of angry displays of the elements, fire, or flood.

Seeing that the country from Yuma to near the breakfast station is traversed during the night, little or nothing can be said here of its nature and scenery; but upon awaking a beautiful sight presented itself to the traveler: the snow-capped tops of the majestic Sierra Nevada appear to you, the surrounding country broken by countless ravines is covered by small trees of different varieties interspersed with cacti and other bushes; here and there an Agave with its sharp pointed leaves sends out its stem which will in a few months be adorned by the flowery capsule peculiar to this plant. The yucca gloriosa also is well represented on this sandy ground; the heavy rays which have just passed have materially advanced the growth of every thing, leaving the traces of its abundance in every gulch and low bottom; the pyramidal white flowers of the mentioned yucca are already beginning to appear in small numbers.

Mr. James Tallmadge, who has just returned from a visit to Sonora, relates a striking example of the terror that now reigns among the people of that country on account of the Apache raids. He is stopping at a small town called San Ignacio, and one evening the little place was thrown into a state of the utmost excitement by the arrival of a Mexican Mexican who had just returned from the mountains, leaving the traces of his journey in every gulch and low bottom; the pyramidal white flowers of the mentioned yucca are already beginning to appear in small numbers.

REDUCTION WORKS.

Proposition from the Hawkeye Reduction Company Considered at a Public Meeting.

A meeting of the citizens of Tucson was called at the City Hall on Wednesday evening, June 23d, to take some action regarding the proposition made by the Hawkeye Reduction company to erect a plant in this city. There were present some fifty or sixty of the representative men of the city.

The meeting was called to order at 8 o'clock, and Mr. Albert Steinfield was elected chairman, and Mr. E. B. P. mayor, secretary. The chairman stated the object of the meeting, and Mr. Z. L. Tibbels of the committee heretofore appointed to report upon the proposition of the company, read the report of the committee, which was as follows:

Albert Steinfield, Esq., Chairman Citizens Meeting, Tucson, Arizona: Said:—The proposition submitted at the last meeting to make a full investigation of certain propositions submitted to said meeting by Messrs. Curtis & Carey, in relation to the proposed plant, a corporation organized under the laws of the State of Iowa, be leave to submit the following report:

First.—The proposition submitted by Messrs. Curtis & Carey, was in substance, as follows: To erect, in the city of Tucson, a smelter of the capacity of twenty tons per day, and under to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:

First.—That the County of Pima donate to the said company, for its works, houses, side tracks, switches and a water supply, and to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:

Second.—That the County of Pima donate to the said company, for its works, houses, side tracks, switches and a water supply, and to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:

Third.—That the County of Pima donate to the said company, for its works, houses, side tracks, switches and a water supply, and to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:

Fourth.—That the County of Pima donate to the said company, for its works, houses, side tracks, switches and a water supply, and to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:

Fifth.—That the County of Pima donate to the said company, for its works, houses, side tracks, switches and a water supply, and to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:

Sixth.—That the County of Pima donate to the said company, for its works, houses, side tracks, switches and a water supply, and to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:

Seventh.—That the County of Pima donate to the said company, for its works, houses, side tracks, switches and a water supply, and to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:

Eighth.—That the County of Pima donate to the said company, for its works, houses, side tracks, switches and a water supply, and to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:

Ninth.—That the County of Pima donate to the said company, for its works, houses, side tracks, switches and a water supply, and to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:

Tenth.—That the County of Pima donate to the said company, for its works, houses, side tracks, switches and a water supply, and to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:

Eleventh.—That the County of Pima donate to the said company, for its works, houses, side tracks, switches and a water supply, and to include smelting, concentrating and refining works, and to be increased within one year, to a capacity of fifty tons per day, and to be increased within one year, to a capacity of one hundred tons per day of twenty-four hours, upon the following conditions:
